THE EXECUTIVE FORUM · 2027
CONCEPT PITCH FOR 3CDN
8 JANUARY 2027 · ITC GARDENIA, BENGALURU
DESIGNED BY DESIGN HQ (A PRISM SCALE COMPANY)

THE STARTING POINT

3CDN designs rooms. So the room should be the idea.

The Room Is the Signal

Sound, light and LED carry one signal around every guest.

8 JANUARY 2027 · MAGNOLIA, ITC GARDENIA

One room, one day, two audiences

10:30 AM TO 2:00 PM

Morning

Architects and interior designers, 40 to 45

3:00 TO 7:30 PM

Afternoon

Customer delegates

8:00 TO 11:00 PM

Evening

All evening guests

RUNNING ORDER

The day, hour by hour

Morning

10:30 AM	Discussion, one break
12:30 PM	Lunch with attendees

Afternoon

3:00 PM	1-on-1s
4:30 PM	Introduction
4:45 PM	Jon Sidwick
6:15 PM	Moe and Arun

Evening

8:00 PM	1-on-1s, drinks, food
Later	Live band after dinner

Setup from midnight on 7 January. Dry runs 8:00 to 10:00 AM on the 8th.

KEY VISUAL · OUR PICK

Fluted glass

FOR LED AND SCREENS

Fluted glass, dark

FOR PRINT

Fluted glass, white

KEY VISUAL

Four more directions

KV1

Infinity

KV2

Aurora

KV3

Glass waves

KV5

Emerald spirals

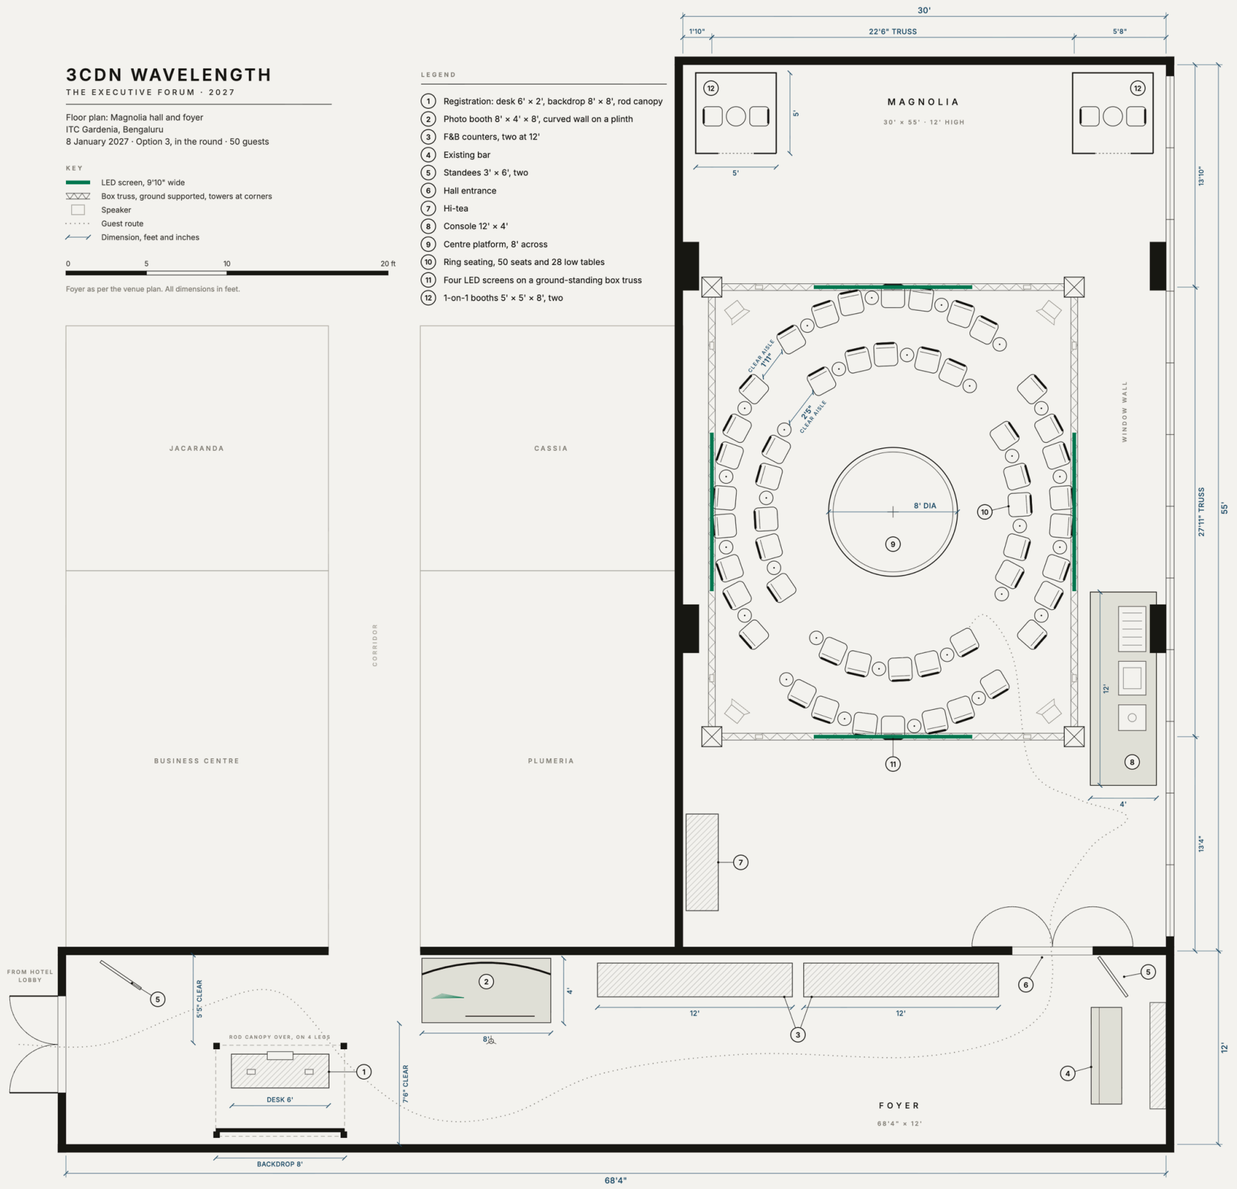
OVERALL LAYOUT

Foyer and hall, to scale

Option 3, in the round. 50 seats, four LED screens on a ground-standing truss.



Nothing hangs from the hotel ceiling

The truss stands on four ground towers.

WALKTHROUGH

Walk the room before it is built

THE EXECUTIVE FORUM 2027

OPTION 1

Three LED walls in a line

25/50

SEATS SEE A SCREEN CLEARLY

OPTION 2

Two LED walls and a backdrop

11/50

SEATS SEE A SCREEN CLEARLY

OPTION 3 · OUR RECOMMENDATION

Four-side LED, in the round

50/50

SEATS SEE A SCREEN CLEARLY

CLEAR VIEW PARTIAL VIEW POOR VIEW

How many seats see a screen clearly?

25 of 50 seats

Option 1 · Three LED walls in a line

24 partial, 1 poor · 75 LED panels

11 of 50 seats

Option 2 · Two LED walls and a backdrop

33 partial, 6 poor · 56 LED panels

50 of 50 seats

Option 3 · Four-side LED, in the round

Every seat clear · 72 LED panels · our recommendation

Each seat is scored with 3CDN’s own Magnolia model, at its screen sizes. One LED panel is a 500 mm cabinet.

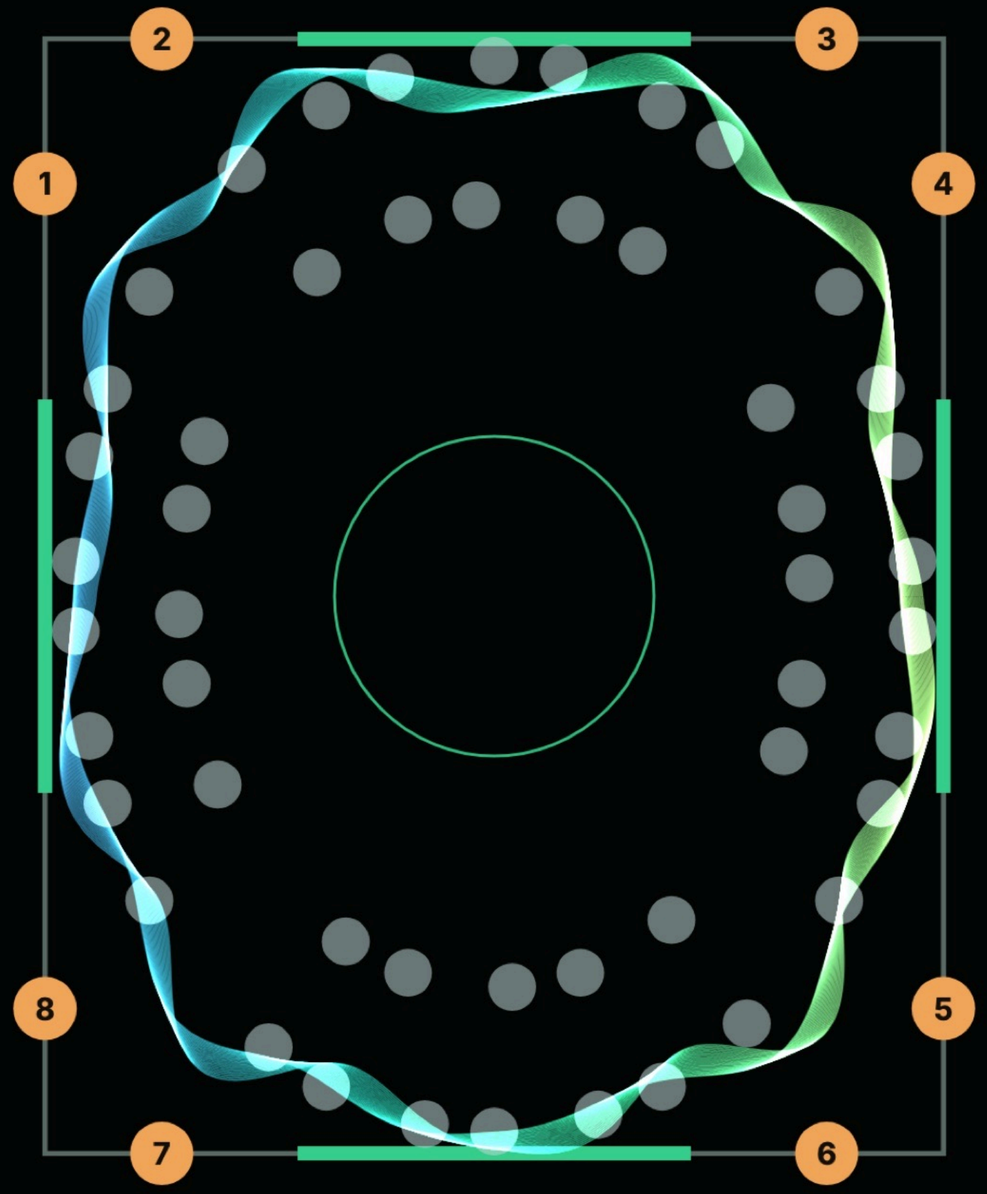
SOUND

Spatial audio by 3CDN

01 **8 speakers, 8 amplifiers**
Sound travels around the guests

02 **Voices stay anchored**
Only music and content move

03 **A listening moment**
In each event, guests hear it for themselves



ONE SIGNAL, ALL DAY

How the room behaves

MOMENT		SOUND	LED	LIGHT
10:30 AM	**Morning**	Listening moment	Slow line loop	Soft and even
4:00 PM	**Walk-in**	One tone circles the ring	Line moves screen to screen	Low and warm
4:30 PM	**Introduction**	Noise settles to one tone	One line per guest resolves	Table lights wake
4:45 PM	**Jon Sidwick**	Voice only, anchored	One clean line	One pool of light
6:15 PM	**Moe and Arun**	Music returns under breaks	All screens lock in phase	Room slowly builds
7:25 PM	**Close**	Final signal leaves the room	Rings radiate outward	Tables light in turn
8:00 PM	**Evening**	Low music, band after 9:00	Slow, low glow	Warm amber

3CDN’s session loops are re-cut for the chosen stage and run on this same timeline.

IN THE ROOM

Four tech ideas

01

Pulse opening

Guests’ own answers shape the wave.

02

Continuous ribbon

A slim LED band joins the four screens.

03

Table lights

The wave travels through the guests.

04

One timeline

Sound, LED and light from one show file.

Pulse opening is subject to Blue Touch Paper’s OK. The ribbon is about 38 cabinets on top of the 72, or lighter LED strips on the truss.

SHOW CONTROL

One show file runs the room

SHOW COMPUTER

One scene per session

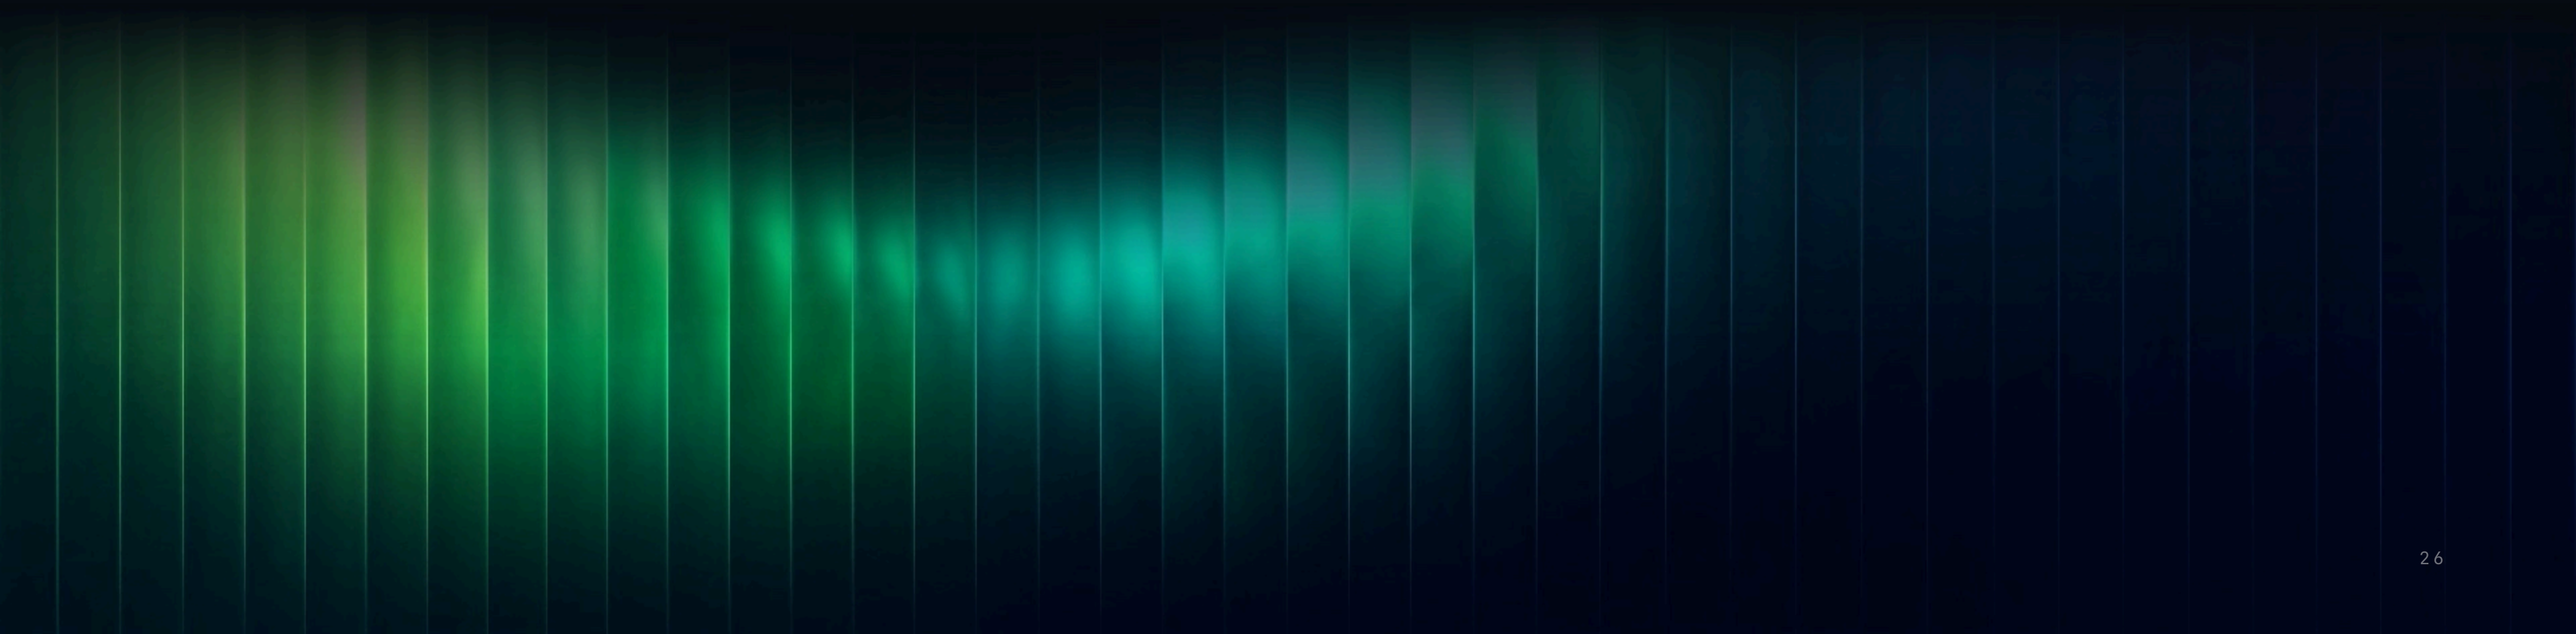
If a speaker runs late, the operator holds the scene. A second machine runs as backup.

LED	One canvas across four screens
SOUND	The wave follows the sound’s position
STAGE	Headset mic, floor monitors, countdown clock
CAMERA	High-refresh LED that films clean

REGISTER · ARRIVE · TAKE PART

TECH WAVELENGTH

One QR. One platform. Every guest on the same wavelength.



TECH WAVELENGTH · 01

From invite to seat in four steps

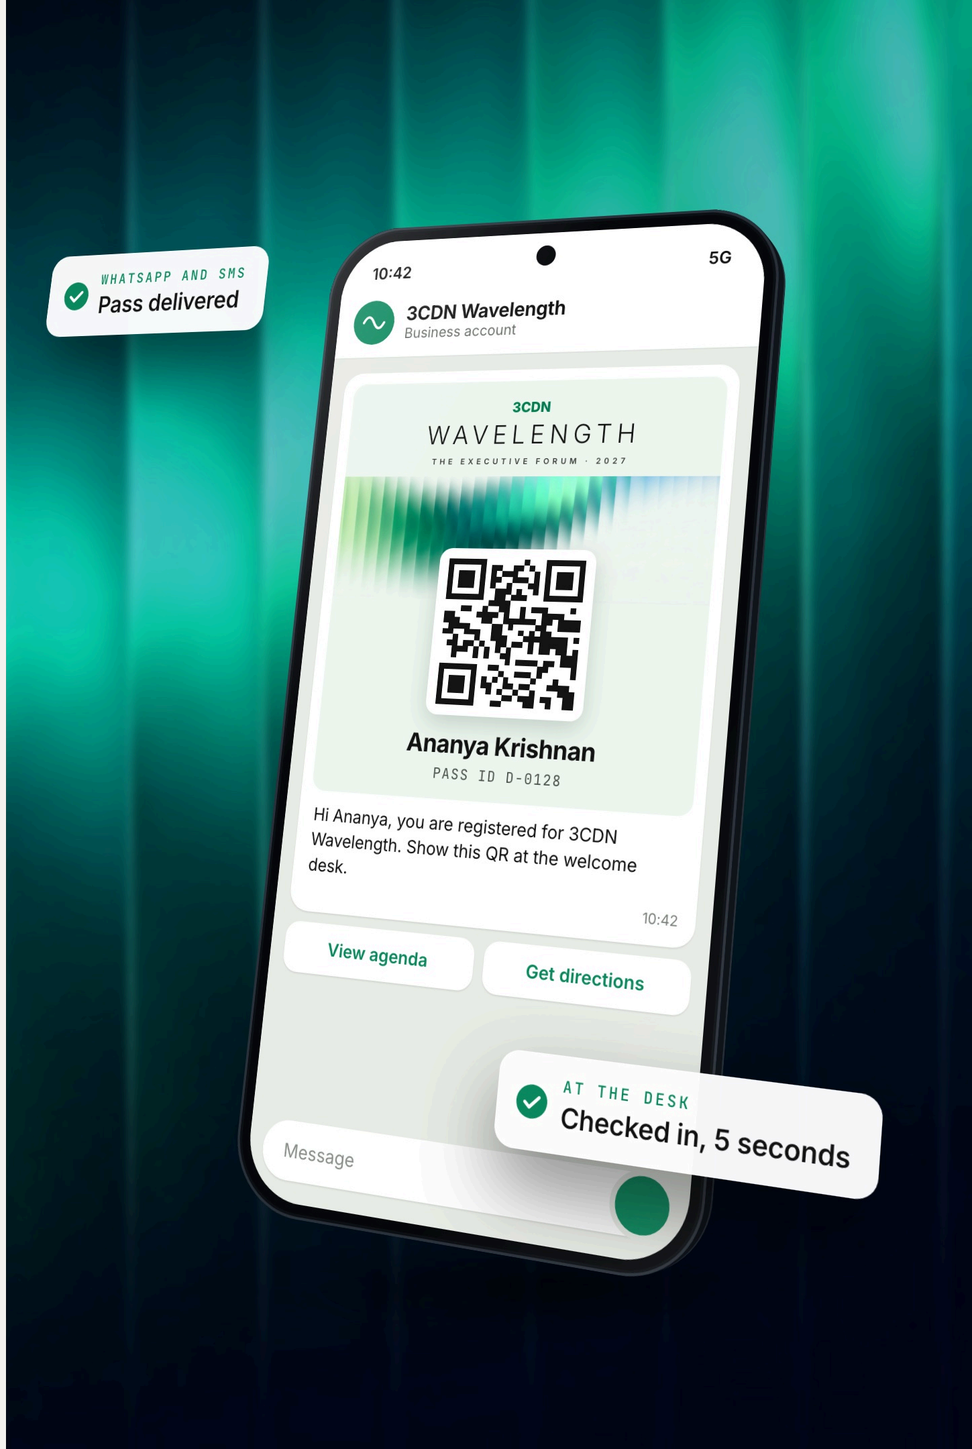
No email. No app to download. No queue.

01 **Invite**
A personal registration ID

02 **Register**
One minute on the phone

03 **Pass**
QR pass on WhatsApp and SMS

04 **Arrive**
One scan at the welcome desk



STEP 04 / 08

Scan at the venue. Checked in.

One scan to enter. A face scan draws the guest's Wavelength Portrait.

TECH WAVELENGTH · 02

One QR runs the whole day

01 **Live ID card**
Printed in under a minute

02 **Agenda on the phone**
Arrives on WhatsApp at check-in

03 **Goodies**
One scan, no double collection

04 **Live dashboard**
Who has arrived, who is missing

05 **Your photos, found for you**
By face match

ID CARDS

Two card designs

A Emerald spiral

B Aurora

Name, role, company, QR and a delegate tag on each. The live card adds the guest's wave-line portrait. The final card follows the chosen key visual.

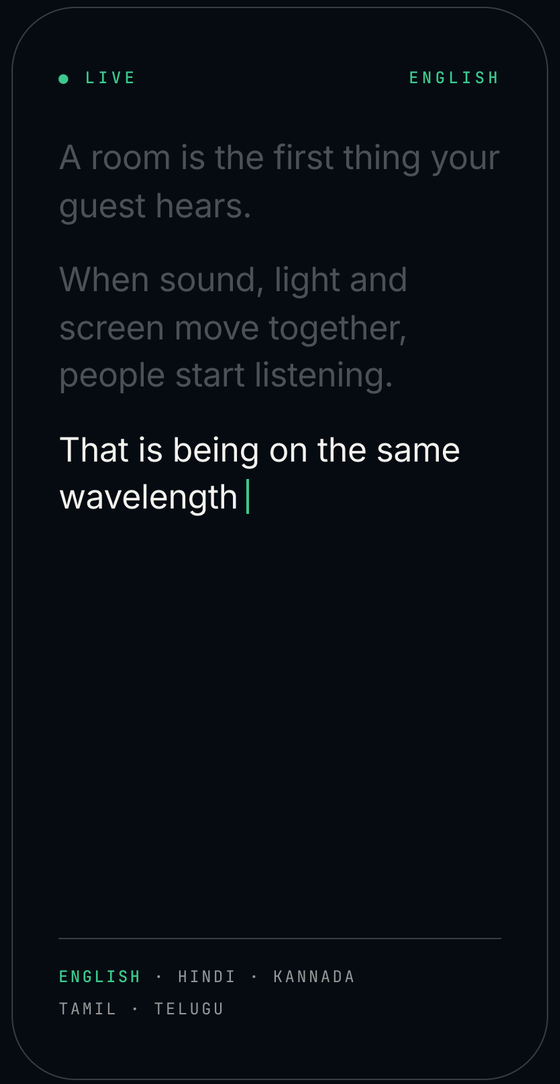
TECH WAVELENGTH · 03 · LIVE TRANSCRIPTION AND TRANSLATION

Every guest follows every word

01 **Scan the QR on your table**
Pick a language

02 **Read along**
The talk appears on your phone as it is spoken

03 **Listen**
Earphones for a translated voice



3CDN gets a full written record of the day, ready for The Wavelength Report.

Technology that makes every guest part of the signal

AT THE DOOR

- Smart registration
- Live photo ID card
- Goodies on the same QR
- Live dashboard with AI insight

IN THE ROOM

- Agenda on your phone
- Live transcription and translation
- Your line on the wave
- Pulse wave
- Live poll
- 1-on-1 meeting booking

TO TAKE HOME

- Wavelength Portrait
- AI photo finder
- The Wavelength Report

Each one is optional. Pick the ones that fit your day.

REGISTRATION · OPTION 1

Wave desk, rod canopy

8 ft backdrop, 6 ft desk, two check-in points. The canopy stands on its own legs. Shown in Emerald spirals. The final build follows the chosen key visual.

REGISTRATION · OPTION 2

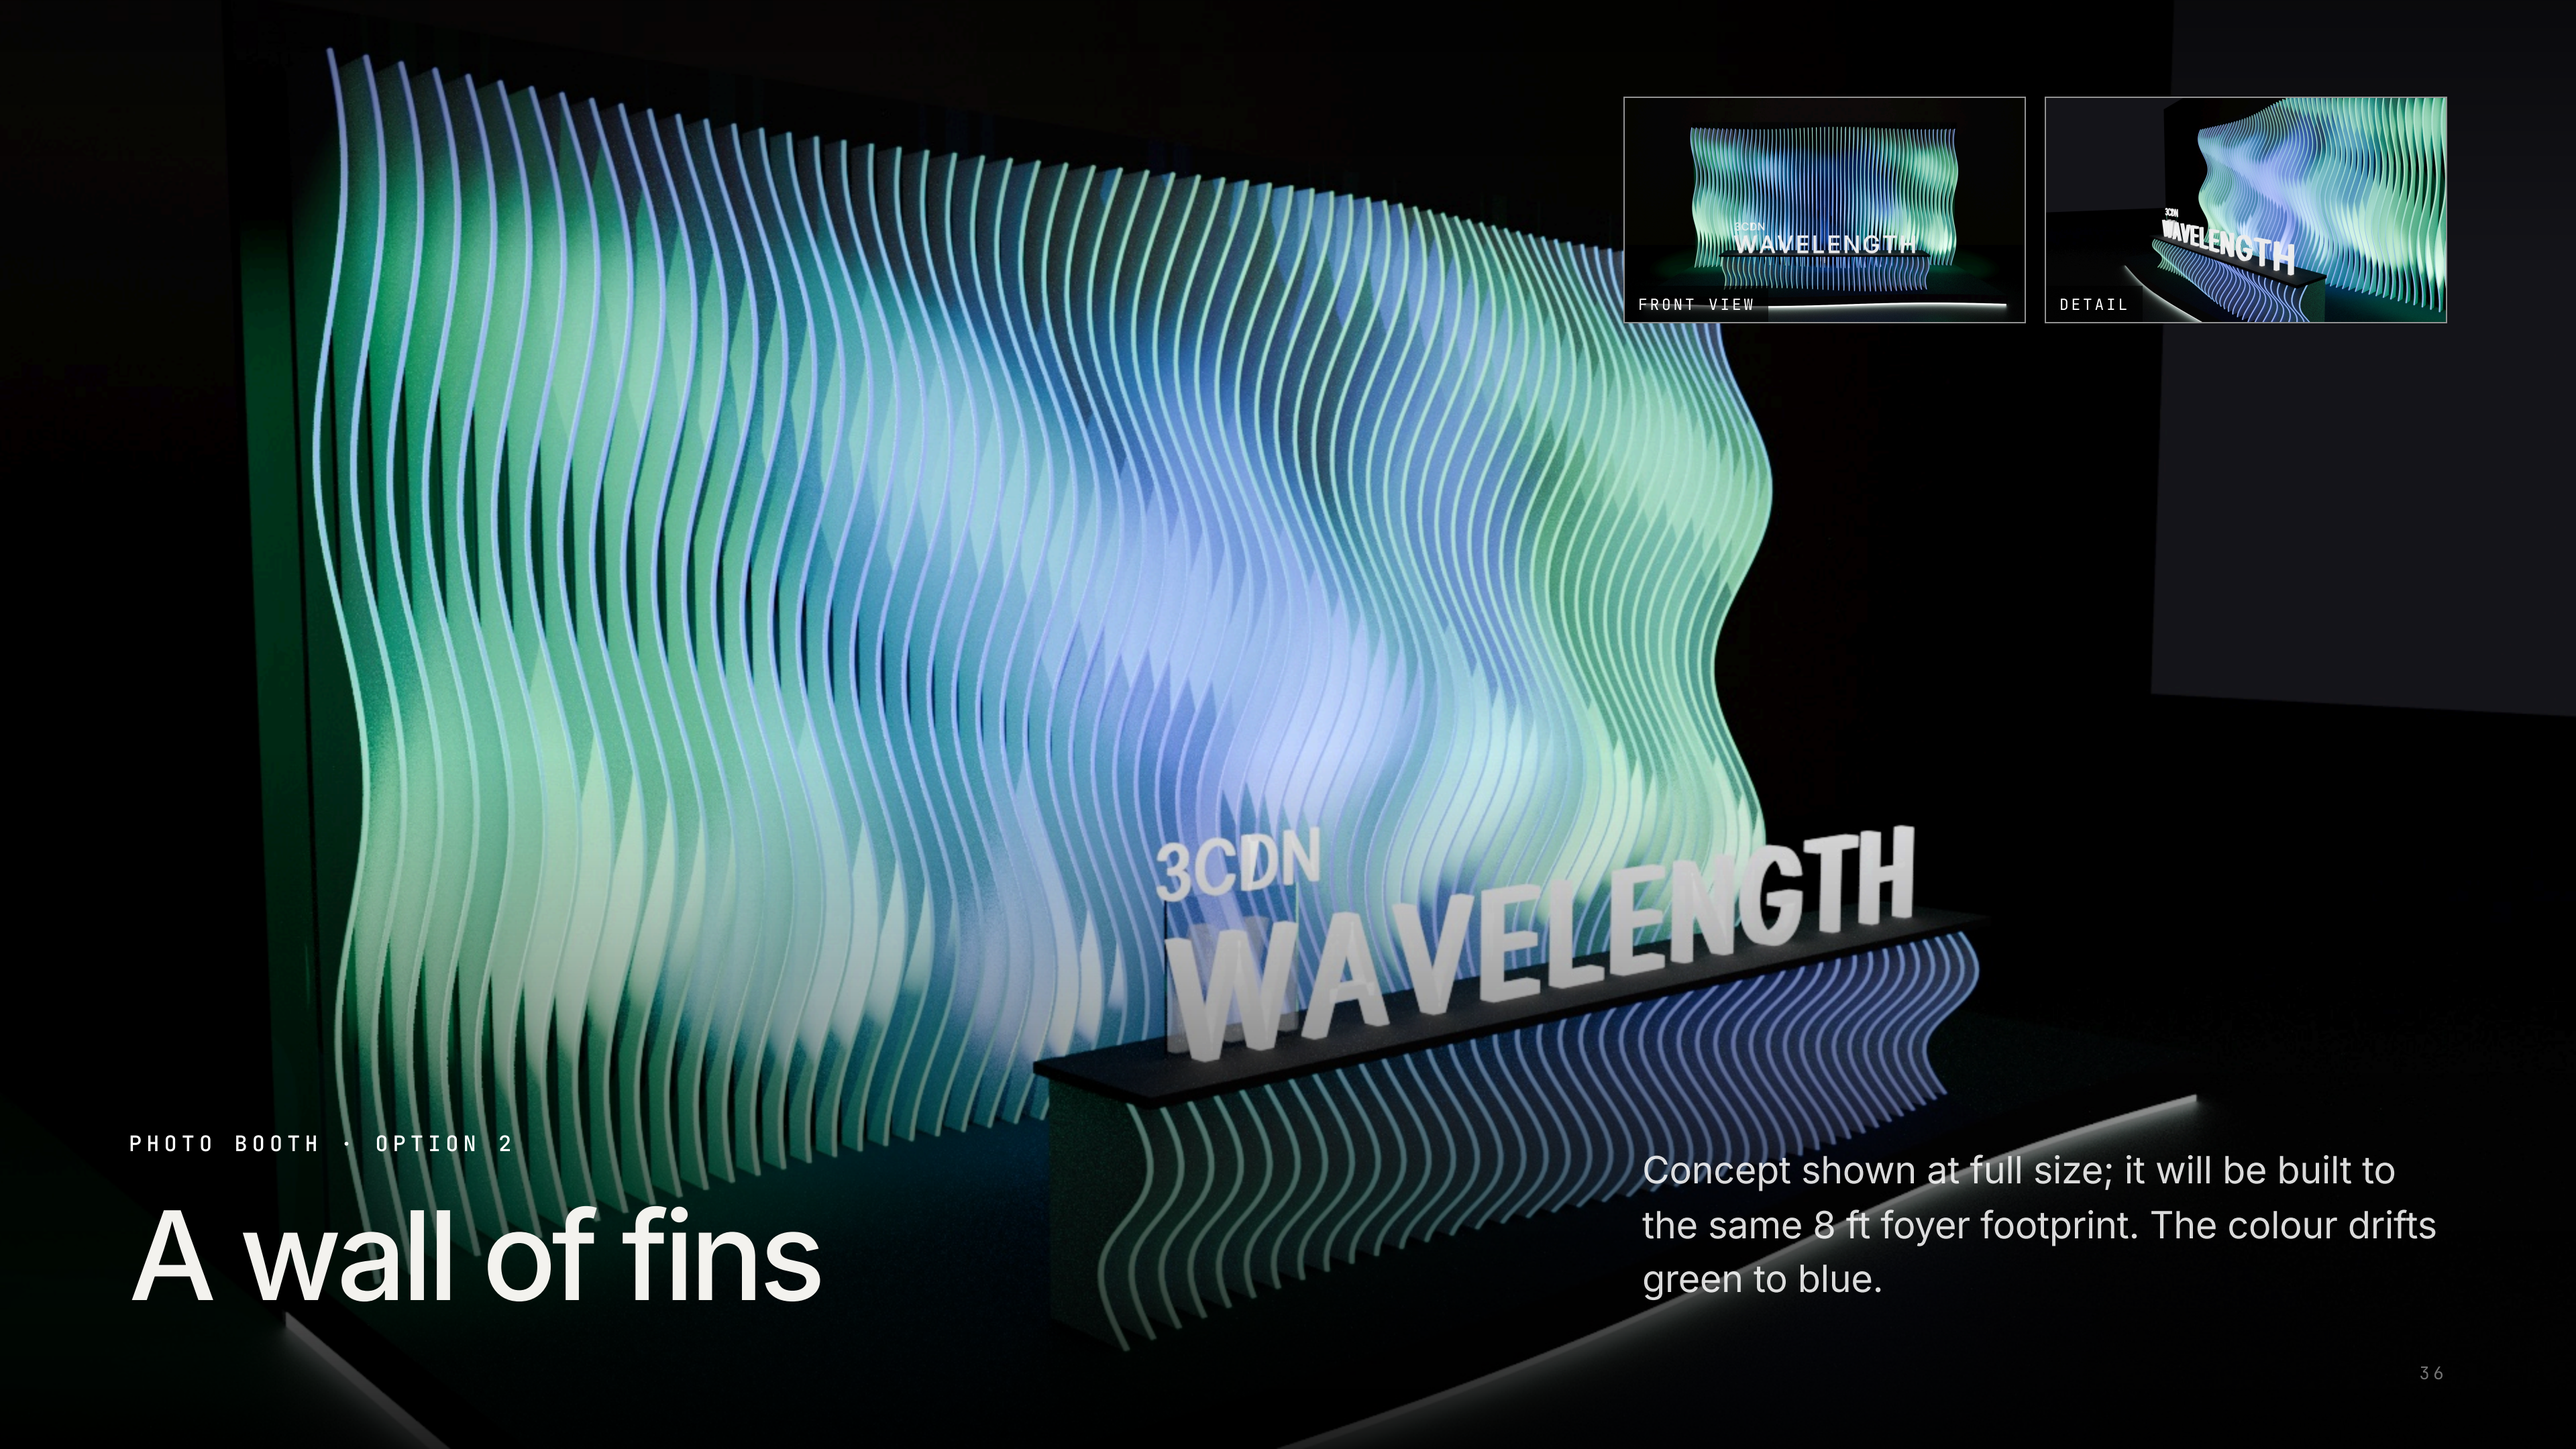
Arched backdrop, pipe desk

Concept shown at full size; it will be built to the same 8 ft foyer footprint. Shown in Aurora. The final build follows the chosen key visual.

PHOTO BOOTH · OPTION 1

A wave of light

8 ft wide, 4 ft deep, 8 ft high. Guests stand on the plinth, behind the letters. Shown in Emerald spirals. The final build follows the chosen key visual.



FRONT VIEW

DETAIL

PHOTO BOOTH · OPTION 2

A wall of fins

Concept shown at full size; it will be built to the same 8 ft foyer footprint. The colour drifts green to blue.

INSIDE THE BOOTH

The Wavelength Portrait

Say one word. Your portrait is redrawn in wave lines, and your voice sets their rhythm.

Sample from a test photo. Voice input is in prototype.

STANDEES

Welcome and directions

OPTION A

Emerald spiral

OPTION B

Aurora

Two standees, 3 ft × 6 ft. Final wording and arrows follow the floor plan.
The final design follows the chosen key visual.

TIME WITH JON, MOE AND ARUN

1-on-1 booths

16

15-minute slots,
two private booths

3:00 to 4:00 PM and 8:00 to 9:00 PM. Booked ahead through the invite.

The same room, after 8:00 PM

Seating out, cocktail tables in. The band plays inside the ring.

PEOPLE AND COVERAGE

MC and event coverage

MC

One senior voice, both events

Shortlist and fees follow with the costing.

PHOTO

Photography across the whole day

FILM

Short and long after-movies

LED loops become the film’s titles.

RISKS

Already planned for

01	Overnight setup	Pre-rigged and pre-mapped off site
02	Speech in a hard room	Voices anchored, tuned in a quiet hall
03	Daylight	Blackout for both sessions
04	Truss and weight	Ground-supported, signed off with ITC after a site measure
05	7:30 PM changeover	Rehearsed 30-minute reset
06	Speaker in the round	Headset mic and floor monitors
07	Evening 1-on-1s	Band starts after 9:00 PM

NEXT

To lock together

01 Stage option and guest numbers

02 Key visual: Fluted glass, or one of the other four

03 Where the spatial audio moment sits
